

In the spring of 2010, more than 600 educators nationwide completed the online [Vision K-20 Survey](#) to check their progress in creating a technology-rich learning experience for students at K-20 institutions.

During this webcast, participants found out how 2010 survey respondents measured up to the SIIA Vision goals and benchmarks for education, including 21st Century tools, accessibility, differentiated learning, assessment tools, and enterprise support. View slides and play the audio below to learn where education leaders believe they've made the most progress - and the least - and how this progress compares to the previous two years' results. Finally, find out how member companies can leverage the survey information and other Vision K-20 initiatives.

Presenters:

- Karen Billings, VP Education Division, SIIA
- Sue Collins, Principal, CollinsConsults
- Lillian Kellogg, VP, Client Services, Education Networks of America (ENA)
